

Pro MGA Global Solutions launches Orb Specialty – connecting capacity with incubated MGAs

London, UK, 9 September, 2025 – Pro MGA Global Solutions, part of leading trusted advisor for the specialist insurance sector Pro Global, has today announced the launch of **Orb Specialty**, an independent Managing General Underwriter (MGU) designed to connect capacity with high-potential Managing General Agents (MGAs) within the Pro MGA Global Solutions incubation ecosystem.

Empowering carriers to deploy capacity efficiently and MGAs to access multi-year stability, Orb Specialty sits at the centre of the trusted Pro MGA Global Solutions ecosystem. Initially launching in the UK and operating as an appointed representative of Pro MGA Solutions Ltd, the MGU will centralise and distribute capacity to select MGAs under incubation, leveraging Pro Group's regulatory, compliance, and operational infrastructure.

Orb Specialty launches with a mission to enable carriers to have a single point streamlined route to MGA distribution and centralised oversight. At the same time, the platform will provide MGAs with guided capacity partnerships, data driven portfolio management, and a proven incubation framework via the Pro MGA Global Solutions ecosystem. Positioned for scalable, multi-jurisdictional growth, the new platform offers a capital-light, performance managed, governance-led solution that enhances efficiency and underwriting confidence across the fast-growing global delegated underwriting market.

The platform is built on three core principles:

- **Strategic Connections** – Leveraging data, performance analytics, and market intelligence to pair MGAs with capacity partners whose appetite and risk philosophy complement their portfolios. Orb Specialty is a complementary platform to existing capacity provided through the Pro MGA Global ecosystem to MGAs under incubation.
- **Operational Excellence** – A tech-enabled MGU, providing MGAs with end-to-end operational support, regulatory oversight, and access to shared services aimed at supporting profitable underwriting.
- **Sustainable Partnerships** – Building multi-year, mutually beneficial relationships between capacity providers and MGAs to support stable growth and consistent service to our valued broker partners.

Danny Maleary, CEO of Pro MGA Global Solutions, said:

“Our MGA ecosystem thrives when capacity partners and MGAs are strategically aligned. A highly innovative tech-enabled MGU, Orb Specialty will bring together the right capacity, the right underwriting talent, and the right tech infrastructure - enabling MGAs to focus on what they do best: delivering profitable underwriting. Orb Specialty is being built to redefine delegated capacity by becoming the trusted, global data-driven bridge between insurance capital and entrepreneurial underwriting talent worldwide. With the launch of Orb Specialty, we’re building an integrated MGA marketplace focussed on underwriting excellence.”

Steve Lewis, CEO of Pro Global, said:

“The launch of Orb Specialty is a natural evolution of Pro’s commitment to supporting entrepreneurial underwriters and capacity providers alike. By combining Pro MGA Global Solutions’ proven incubation infrastructure with a dedicated MGU platform, Orb Specialty creates new opportunities for sustainable, profitable growth across our growing ecosystem. We look forward to working with our capacity and broking partners to align our efforts, strengthen underwriting confidence, and deliver exceptional MGA performance.”
